IGEFS

Inclusive green energy finding system

Introducing IGEFS, IGEFS is the inclusive green energy finding system .

A Problem with green energy is access, most people are unaware of how to get clean energy resources around them. Another problem is cost, Green energy resources are usually very expensive

IGEFS solves this probem by making the information easier to access and also break down payment into installments

1

Built with the Intention of making finding green energy resources as easy as possible
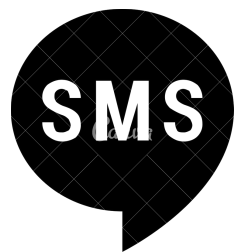

Very Simple Steps

 Dial the USSD Code.

 Select Your location

 Voila! you receive a text showing you the nearest green energy Retailers around you
